

Iowa Army Ammunition Plant

BRAC 2005 Recommendation:

BRAC 05 recommendations transform Iowa Army Ammunition Plant into a multi-functional Munitions Center of Excellence that fulfills total munitions capability through Munitions Production, Munitions Demilitarization, Munitions Storage and Distribution and Munitions Maintenance. The goal is to support Joint readiness by producing, maintaining, storing and delivering in a timely manner, the munitions needed to support the war-fighter. This effort was accomplished through the elimination of excess and redundancy within the industrial base. Costs identified to modernize remaining infrastructure will allow us to move out of a Cold War environment into one that is capable of supporting 21st century requirements for the manufacture of artillery, bombs, Energetics, medium caliber, missiles, mines, mortars, rockets, pyro/demo, small caliber, tank and torpedoes.

Gains:

- ICM and Missile Warhead functions from Kansas Army Ammunition Plant
- Mines and Detonators/Relays/Delays functions from Lone Star Ammunition Plant

Losses:

- None
